

## Anti-snow and rain solar aviation Lamp

Anti-snow and rain solar air lamp using optical control automatic control, night or foggy weather automatically open, daytime automatic shutdown, strong reliability, Flash cycle can be set according to need.

| Solar Aviation Obstruction Light             |  |
|--|--|
| Model  | Specification  |
| DK-HK-01                                     | Material:PC Shell  |
|  | Shell Size: 130mm * 130mm * 135mm  |
|  | Solar panel: 0.1w * 15 = 1.5w  |
|  | Operating voltage: 3.2V  |
|  | Battery: 3.5AH   |
|  | Flashing frequency: 50-60 times / hour (factory confirmation)                |
|  | Operating Current: 100MA   |
|  | Warning distance: ≥3000 m  |
|  | Ambient temperature: -30 °C -60 °C.  |
|  | Working Hours: rainy days without light or more consecutive 70 hours         |
|  | Control: with light control function (daytime light does not shine at night) |
|  | Fixed: Warning base fixed to the form work or uprights                       |
| Color: Red, yellow, blue, transparent, green |  |
