

Double Aviation light

Dual-head Solar aviation obstacle light is a kind of bright or flashing red safety light, do not need external power supply, composed of its own solar panels to form a system.

Product Specifications

DK-AO-02	Shell color: red, yellow, blue, white, green	
	Maximum continuous running time of 140 hours	
	Light way: Flashing/Steady	
	Visible distance: 3-5 km	
	LED Number: 60 pcs LED	LED Brightness: Single 11000mcd
	LED life: more than 50,000 hours	
	Solar panels: 15W/16V the conversion efficiency of monocrystalline silicon (> 18%) over the life of 10 years	
	Battery type: 12V/13.2AH Li-ion battery, charge&discharge times more than 2000 times	
	Shell Material: lampshade PC, Base box:Baking paint iron Box	
	Ambient temperature: -40 °C ~ + 80 °C	
	Best Ambient temperature: -20 °C ~ + 35 °C	
	Waterproof: IP65.	
	Product Dimensions: Shell diameter 145MM, Base box Size: 380*130*130MM	
The product can be disassembled replace any parts. Products are widely used beacon, airport runways, high-rise buildings, communications towers, wind power tower crane, electricity chimney, inland waterways, sea bridges, etc
